<b>Abstract</b>	
A national survey on the living conditions of people aged over 45 was conducted in 2007. Based on the above survey, this paper examines the concept of successful ageing empirically. Main findings include: (1) Keeping a healthy lifestyle is still necessary although health conditions are deteriorating during the ageing process. (2)The elderly face more depression problems than their counterparts. (3) People aged over 50 have started leaving the labor market. Neither middle-aged people nor the elderly are involved in volunteer services actively. (4) More elderly do not have any religions than their counterparts. (5) About 10-20 percent of respondents cannot make ends meet except people aged over 80. In addition, 10-20 percent of people do not have any financial planning for retirement. As for the factors affecting the fulfillment of successful ageing, educational levels as well as family income really counts. Besides, respondents do not show the same conditions among the five dimensions of successful ageing. Finally, policy recommendations are presented.	
<b>Kind of Data</b>	##### (Sample survey data)
<b>Unit of Analysis</b>	individuals

<b>Scope &amp; Coverage</b>	
<b>Time Period(s)</b>	2007
<b>Countries</b>	Taiwan
<b>Geographic Coverage</b>	
Taiwan	
<b>Universe</b>	
Taiwanese aged over 65	

<b>Producers &amp; Sponsors</b>
