Edition

Questionnaire, Friend/Relative Questionnaire

(For children aged 0 to 72 months)

Dear primary caregive	rs.

Hello! We, the research team of the "Kids in Taiwan: National Longitudinal Study of Child Development and Care", are truly grateful that you have agreed to your child's participation in this research project and your assistance in filling out this questionnaire.

The purpose of this questionnaire is to learn more about children's health, their cognitive, language, social emotional, and motor development, as well as, their home and childcare environment, quality, and experiences. Because the items of this questionnaire were designed for children across a range of ages, please do not worry if you find your child unable to do something described by an item of the questionnaire. In order for us to gain a complete and accurate understanding of your child's development, please answer these questions with patience and answer all questions if possible. Please know that all personnel involved with this research project will strictly abide by the regulations stated in the non-disclosure agreement. Personal information about our research participants will never be disclosed. Please do not worry.

The research team would like to thank you once again for participating in this important research project and send you our best regards.

Our team is composed of national experts and scholars in the field of child development and early childhood education. The purpose of this project is to understand the development of infants and children in Taiwan. The results of this study will allow us to provide specific suggestions and evidence to parents, childcare providers, policymakers, and related personnel. Thank you so much for taking the time to participate in this project.

All the best,

The research team of "Kids in Taiwan: National Longitudinal Study of Child Developme	nt and
