

# Women's Marriage, Fertility and Employment Survey, 2016

## User Guide

- I. The Center for Survey Research (CSR), Research Center for Humanities and Social Sciences Academia Sinica reorganizes and releases the data offered by Directorate-General of Budget, Accounting & Statistics (DGBAS), Executive Yuan. The released files include user guide, Questionnaire, SPSS dataset, STATA dataset, ASCII dataset, SAS program and codebook.

## II. Released File Description

### 1. User guide

userguide2016.doc	including released file description, guideline for data validation and usage, guideline for citation and contact us etc.
-------------------	--

### 1. Questionnaire

ques2016.pdf	2016 Questionnaire
--------------	--------------------

### 2. Datasets

women2016.sav	SPSS dataset
women2016.dta	STATA dataset
women2016.dat	ASCII dataset

### 3. Program

prog2016.sas	SAS Program for running women2016.dat
--------------	---------------------------------------

### 4. Code book

code2016.pdf	code book
--------------	-----------

## III. Guideline for data validation and usage

- (1) CSR has checked wild codes and out-of-range values, to validate and clean data. There is no doubt about data accuracy after the validation.
- (2) Women's Marriage, Fertility and Employment Survey, 2016 is the collateral project investigation of 2016 manpower survey.
- (3) The original village code has been replaced by DGBAS for the 0, so the sample number has a repeat phenomenon.
- (4) In view of sample representativeness and data consistency, parts of subgroups with a small number of samples or recognizable characteristics are not appropriate to employ the estimation of an individual county/city. Therefore, the number of each county/city should rely on the DGBAS's report.

- (5) Please be attentive if “system missing” may not be listed in the variable value because of the design of skip question (N/A), missing/no response and so on.
- (6) The column widths of variable label and value description in the STATA are limited to 80 and 40 bytes, respectively, so the STATA dataset shows only the first 80 bytes as variable label, and the first 40 bytes as value description. In case of cut-off contexts, please see code book.

#### **IV. Guideline for citation**

Citation, based upon the requirement of various journals, theses or dissertations, can be revised.
