III. Guideline for data validation and usage

1. The Center for Survey Research (CSR), Research Center for Humanities and Social Sciences Academia Sinica, has checked wild codes and out-of-range values, to validate and clean data. There is no doubt about data accuracy after the validation.
2. Weighting:
The survey data are weighted by raking with gender, age (5 groups), education (5 groups), and strata (Taipei has no strata; Taichung and Kaohsiung are 5 groups). The population parameters are referred to *Demographic fact book, Republic of China* which published by Ministry of The Interior Republic of China in 2015.

IV. Guideline for citation

Citation, based upon the requirement of various journals, theses or dissertations, can be revised.
