Abstract

To understand the activities, expenditure behaviors, impressions, satisfactions, and purposes of travelers visiting Taiwan, the Tourism Bureau (MOTC) conducts the " 2002 Annual Survey on Visitors Expenditure and Trends" and provides the authorities in Taiwan with references for designing and improving domestic recreational facilities, for outlining international advertising on sightseeing and executing the marketing strategies, and for estimating the volume of foreign exchanges earned by the tourism industry. Six thousand two hundred and fifty three valid questionnaires are obtained from interviewing those visitors who are making their departure and randomly sampled in the CKS International Airport and the Kaohsing International Airport.
